Change is coming for 2017!

On October 1, 2016, the Centers for Medicare and Medicaid Services (CMS) will add another 6,000 codes to the ICD-10 diagnostic library, officials announced in a March 9, 2016 meeting. The addition will come exactly one year after ICD-10, with its nearly 70,000 billable codes, replaced the dated, and much more compact, ICD-9 code set.
